

For Sale: FEARLESS

The Fearless was built in 1937 by the Commercial Boiler Works of Seattle for General Const. as the RUBY II. We purchased it in Jan. 2007 we have extensively rebuilt the wheelhouse and galley area. Updated the control system for the main engine and added a new 9 kw Onan generator. It has eight bunks in two staterooms and a shower and head with a vacu flush toilet system. We added rubber all around the tug.

[Editor's Note: Ric is being a little modest -- we have it on good authority that the improvements he mentions are quite substantial and completely FIRST-CLASS!]
